Dimensions

CANISTER INSTALLATION INSTRUCTIONS

- A1 & A2 are the support plates used during the construction installation process to prevent deformation of the installation canister
- Slot in A1 & A2 plates during construction
- Please remove the support plates (A1 & A2) before final installation

Installation canister: L 235 mm x W 65 mm

Why is the IP rating important? In brief, IP (Ingress Protection) ratings are defined in EN 60529 and simply defines the ability of an electrical product to seal and protect against the intrusion of foreign objects and water.

(I) As the first numeral stands for intrusion of a foreign object, where (P) as the second numeral stands for the penetration of moisture.

As a guide IP20 rated products would be seen in interior spaces with no requirement for protection against the elements, where an IP65 product would be found in an exterior application which required substantial protection against the elements.

Need more information on IP ratings? Check out the SAL web FAQ's or speak to your local SAL team member.
