

9-in-1 TRI Colour LED Globes

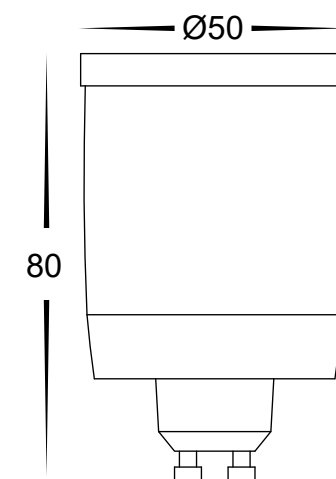

The HV9509 9-in-1 GU10 LED Globe offers exceptional flexibility by combining three selectable wattages and three selectable colour temperatures in one globe, providing nine lighting configurations to suit a wide range of applications.

Featuring selectable 5W, 7W or 9W output and 3000K Warm White, 4000K Neutral White or 5500K Cool White colour temperatures, the HV9509 allows the light output and ambience to be tailored to each installation. Its 60° beam angle provides a broad, even distribution of light, while TRIAC dimming allows further adjustment of the light level when used with a compatible dimmer.

Designed for 240V GU10 fittings, the HV9509 is available with either a frosted or clear diffuser and is ideal for residential applications where flexibility, performance and simplified stock management are important.
