

UNDERSTANDING YOUR REMOTE

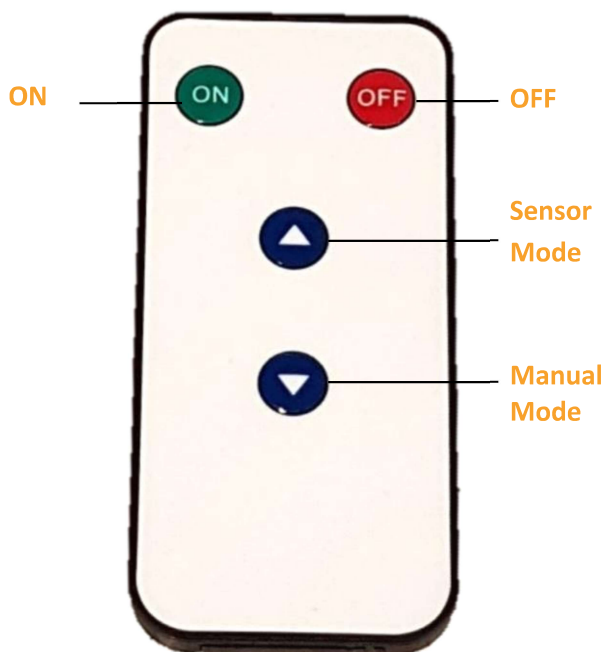

SLDMP008-610-PIR

Sensor Mode:

The light will only operate in a dark environment & is sensitive to movement

Manual Mode:

The light will only work if manually tuned on/off. The light will not automatically turn on at nightfall and is not sensitive to movement

ON

Press once to Switch Light on. Alarm will beep once.

This will Default the Light into Sensor mode. A dull light will be emitted (approx. 100lm) when no movement is detected. Once the sensor is triggered the light output increases to 600 lumens for approximately 20 seconds

OFF

Press once to switch light off completely

OR

ON

Press Twice to switch the Alarm feature on. Alarm will beep twice and take approximately 20 seconds to set. Once set, you will hear a long beep to confirm

Light will operate as per the previous option, however if movement is detected both the brighter lights & alarm will operate together for approximately 20 seconds.

OFF

Press once to silence the alarm feature
