*Replacement wattages are approximates and are to be used as a guide only.
†Relates to LED life - actual life may vary depending on individual circumstances.

As part of our new state-of-the-art product line, these MR16 angle-adjustable globes are unique with their adjustable beam angles and high brightness making them perfectly suited for recessed, track and landscape lighting applications in and commercial retrofit installations.

Adjustable angle:

- Narrow flood (25 degrees): focused intense light. Use a single light or use a group of light to illuminate a small area or an object
- Flood (40 degrees): a combination of focused and flood lighting
- Wide flood (50 degrees): light spreads out over a larger area

Design:

Thermoplastic material and insulated power driver protect users from electric shocks. The arc-shaped grooves and ventilation slots enhance the convection and bring superior cooling effect. The material's high radiation ratio enables it to dissipate heat quickly, & consequently brings excellent cooling effects, which directly contributes to a longer and more stable service life.
