

240V GU10 Halogen Lamps

Mains voltage lamp with quartz halogen burner positioned in an aluminium coated reflector providing similar light output to MR16 dichroic lamps without the need for a transformer

FEATURES

- Aluminium reflector directs most of the IR radiation or heat to the front of the lamp
- Integral UV stop
- Constant light output over lamp life
- Glass cover
- Dimmable
- Internally fused for safety
- Manufactured to Standard AS/NZS60432.2:2007

APPLICATIONS

- For domestic, commercial, accent and task lighting where the benefits of halogen lighting are required without the need for a transformer
- Especially suited to spotlights and track lighting
