

# Electronic Fluorescent CFST2 and CFL Lamps

## ELECTRONIC FLUORESCENT ENERGY SAVING LAMPS

Lamps are available in a wide range of shapes and wattages, designed to replace common incandescent lamps found in the home such as old GLS, candle, spherical and reflector lamps. By replacing these lamps the energy consumption will be reduced by up to 80%. These lamps provide the benefits of fluorescent light, with the ease of installation of standard incandescent and halogen lamps.

### CFST2, CFL-3 and CFL4 Lamps

A range of long life, energy efficient, compact fluorescent lamps. Their many advantages make them a perfect replacement for standards lamps.

#### Features

- Up to 80% power saving
- 6000 - 8000 average rated life hours
- Integral ballast and starter
- Soft start
- Protected from electrical surge
- High lumen output

#### Applications

- For domestic and commercial lighting
- Outdoor security lighting in weatherproof fittings
- Not suitable for dimming or for use with photocell switches
- For optimum efficiency and lamp life it is recommended to use these lamps in applications where the lamp is not frequently switched
