

Fluorescent Compact PL/PLC Lamps

This extensive range of compact fluorescent lamps offer the same benefits of standard fluorescent tubes with the advantage that their compact size makes them suitable for use in shallow or miniature luminaires. Like standard fluorescent tubes these lamps can only be used in luminaires with an appropriate lamp holder and ballast

Features

- Compact size makes them suitable for use in a variety of applications where incandescent or discharge light sources have been traditionally used
- Large range of colour temperatures and wattage available
- High quality, long life, energy saving lamps
- Manufactured to Australian Standards AS/NZS 60901:2003

Applications

- For commercial applications where a compact, energy saving and efficient light source is required
- Ideal for downlights and wall lights in office buildings, foyers and hotels
- Suitable for indoor use or in protected exterior applications
