

Electronic Fluorescent CGU GU10 Lamps

ELECTRONIC FLUORESCENT ENERGY SAVING LAMPS

Lamps are available in a wide range of shapes and wattages, designed to replace common incandescent lamps found in the home such as old GLS, candle, spherical and reflector lamps. By replacing these lamps the energy consumption will be reduced by up to 80%. These lamps provide the benefits of fluorescent light, with the ease of installation of standard incandescent and halogen lamps.

CGU GU10 Lamps

A range of longlife, energy efficient, compact fluorescent lamps. Their many advantages make them a perfect replacement for standards GU10 base halogen lamps

Features

- Up to 80% power saving
