

Electronic Fluorescent GX53 Lamps

ELECTRONIC FLUORESCENT ENERGY SAVING LAMPS

Lamps are available in a wide range of shapes and wattages, designed to replace common incandescent lamps found in the home such as old GLS, candle, spherical and reflector lamps. By replacing these lamps the energy consumption will be reduced by up to 80%. These lamps provide the benefits of fluorescent light, with the ease of installation of standard incandescent and halogen lamps.

GX53 Lamps

Long life, energy efficient, compact fluorescent GX53 lamp have many advantages which makes it a perfect lamp in lighting applications where halogen bi-pin lamps and fittings are traditionally used.

Features

- Up to 80% power saving
- Integral ballast and starter
