

## Halogen Dichroic Lamps

Low voltage halogen dichroic lamps offer the following advantages:

- A brighter, crisper light than traditional incandescent lamps
- A significantly longer lamp life than old GLS lamps
- Precise and even light distribution
- An energy saving of around 20% compared to traditional incandescent lamps offering the same light output

### ALUSTAR - ALUMINIUM REFLECTOR LAMPS

The aluminium reflector distributes heat and light forward away from the back of the lamp. This high quality reflector provides constant colour with no colour shift throughout the service life of the lamp

### ALUSTAR Halogen Dichroic Lamp Beam Distribution and Lux Levels
