

HALOGEN PAR LAMPS

Crompton's mains voltage PAR20 and PAR30 flood lamps utilise halogen technology and provide constant light output, longer lamp life, better colour rendition and superior luminous efficacy when compared with standard incandescent PAR lamps

Features:

- Prismatic hard glass lens
- Floodlight beam of 30°
- Constant light output during extended lamp life of 2000 hours
- Internally fused for safety

Applications:

- For domestic and commercial accent and task lighting
- Suitable for shop, display and feature lighting in homes and commercial buildings, particularly in applications where good colour rendition and constant light output are important

Usage Notes

- This lamp may be used outdoors but must be protected from direct water contact
- A waterproof gasket must be used between the lamp and the fitting in exterior applications
