

DOUBLE AND SINGLE ENDED TUBULAR ARCHITECTURAL STRIP LIGHTS

Mains voltage tubular incandescent lamps designed for concealed and picture lighting applications in both domestic and commercial environments. The tungsten filament extends over the entire length of these lamps to provide a uniform strip of light

Features

- Available in both single and double ended options
- Available in both clear and opal finishes
- Filament extends over the entire length of the lamp to provide a uniform strip of light
- Internally fused for safety

Applications

- For decorative domestic and commercial applications where a discreet and uniform light source is required
- Commonly used in picture lighting
- Suitable for indoor use only

Usage Notes

- Crompton lighting manufactures a quality 240V striplight fitting complete with flex & plug, designed especially for use with the 60W double ended striplight (fitting code: 24407)
