

BOLT-120 LED Batten

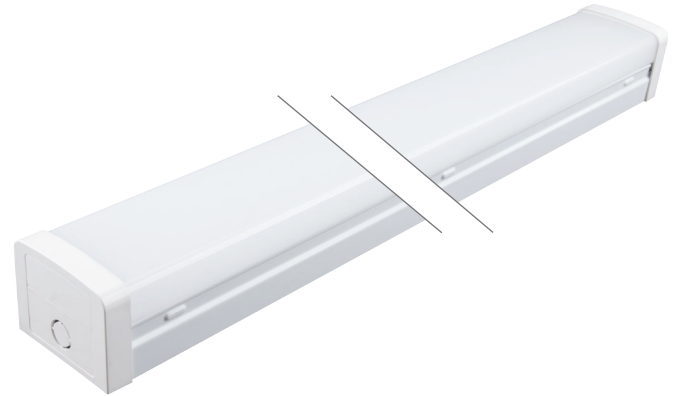

Description

The Bolt LED Batten series is a direct replacement to traditional T8 and T5 Fluorescent battens. Incorporating a “quick fix” solution designed specifically to allow for ease of installation.

The Bolt Series LED Batten also features a dual Wattage option. So, if the area is too bright, simply press the switch located on the LED Driver to reduce the output by almost half.

Pressed body is constructed from high-quality sheet metal, white powder coated with a high transparency opal polycarbonate diffuser. Available in 600mm and 1200mm lengths, 5000K white colour temperature. Suitable for domestic applications such as laundries, garage, storerooms. Also commercially for underground carparks.

Specification Features
