

STRIP-48-BEND-RGB

Flexible LED Strip

Description

Introducing a revolutionary LED strip lighting system. The STRIP-48-BEND-RGB is a patented design exclusive to the Domus range offering mind bending possibilities. Gone are the days of needing to cut and join around corners, bent or curved surfaces. STRIP-48-BEND-RGB accommodates any design idea or installation process. The ability comes from a uniquely designed PCB which cannot only bend up or down like standard LED strip lighting but amazingly curves and 90° bends without the need of cutting and soldering joining wires. Now it's up to you. How will you incorporate this into your new design?

Specification Features

Colours:	RGB
Light Source:	5050 SMD LED
LED Type:	DKI (Korea)
Colour Temperature (K):	Up to 16 million colours*
Number of LED per mtr:	48
Wattage Per MTR (W):	11.5W
Input Voltage (VDC):	12VDC
Beam angle (°):	120°
Wiring:	Parallel
IP Rating:	IP20
Cutting Increments/Sections:	60mm (group of 3 LED)
Requires:	RGB colour controller + 12VDC constant voltage driver**
Dimmable:	Yes, DALI, 0-10V, DMX-512, RF***
IES files:	Yes****

Order Info

Colour Temp:	RGB
Order Code:	20096
Product Code:	STRIP-48-BEND-RGB
Lumens/m:	504 lm/m

* Controller dependent.
 ** For RGB controller options please refer to the controller section for further details.
 *** For colour controller options please refer to controller section.
 **** Available upon request.
