# Tribeca Light Kit™

The Tribeca Light Kit has been designed to compliment Hunter's Industrie II, Tribeca, and Avalon ceiling fans.

The solid glass diffuser provides an even flow of light, and the Tribeca is energy efficient having been designed for use with 1 x E27 energy saving compact fluorescent or halogen globe (*not included*).

**24301:** Brushed Nickel with Solid Frost glass

# Tribeca Light Kit™

The Tribeca light kit replaces the bottom plate of Avalon, Industrie II or Tribeca ceiling fan, and has been designed to compliment the industrially influenced body.

When fitted, this light kit will add 115mm to the overall height dimensions of the ceiling fan.

The Hunter Tribeca Light Kit can be connected easily to a Hunter ceiling fan, as the light has a plug connector which simply clips into the connector on the ceiling fan. This enables the light to be a DIY installation, if the fan is already installed.
