SILVER ICE: THE SECRET REVEALED

Hunter Pacific International (HPI) is proud to introduce the exclusive 'Silver Ice' Premium Range ceiling fans.

By always striving to create new or improved processes HPI continues to deliver unique, high quality products that are at the pinnacle of design, performance and style.

The real key to what makes Silver Ice Premium fans so special lies beneath their elegant exterior. Starting with a highly polished aluminium substrate, each fan is triple plated to produce a finish of exceptional quality, corrosion-resistance and sheer beauty.

This process, performed by experienced and highly skilled craftsmen delivers a deep lustre that will enhance all decors when paired with their equally attractive, gloss finished, real timber blades.
